TRIPP·LITE

NEW! UPS System

Tripp Lite Digital Tower Line-Interactive UPS System

SMX1500LCDT

Multifunction LCD Status Screen

Advanced Protection for Computers and Electronics

Featuring a multifunction LCD status screen, reliable battery backup, automatic voltage regulation, surge suppression and an HID-compliant USB port, Tripp Lite's SMX1500LCDT Tower Line-Interactive UPS System provides advanced protection for a wide range of data center and network electronics, including personal computers, media centers, servers, storage devices and telecom systems.

Reliable Battery Backup

UPS battery backup support enables you to work through short power failures and provides time to save files and perform an orderly system shutdown in case of a prolonged blackout. The SMX1500LCDT features a large internal battery that provides 10 minutes of support for a half load (450 watts). During normal operation, incoming utility power keeps the UPS battery fully charged so that backup power will always be available if needed.

Automatic Voltage Regulation (AVR)

Line-interactive operation, also known as automatic voltage regulation (AVR), protects your equipment from incremental hardware damage, data loss and performance problems that can be caused by low-voltage conditions (brownouts) and overvoltages. The SMX1500LCDT automatically corrects brownouts as low as 170V and overvoltages as high as 280V back to 230V without drawing on battery backup power that may be needed to support your equipment during a blackout.

Key Features

- Multifunction LCD screen shows real-time power data, including input/output voltage, input/output frequency, battery charge level, battery voltage, estimated runtime remaining, connected equipment load level, connected equipment wattage and protection status
- 1500VA load capacity can support a small office or data center setup
- Automatic voltage regulation (AVR) protects equipment by adjusting abnormal voltages to safe levels
- Reliable battery backup supports a half load for 10 minutes
- Surge protection and EMI/RFI line noise filtering prevent equipment damage and malfunction
- HID-compliant USB port and free PowerAlert® software (available from Tripp Lite as a Web download) enable unattended system shutdown and file saves during extended outages
- 2-year limited warranty

Feature Focus

- A Multifunction LCD
- B Power Button
- C USB Port
- D Surge-Only Outlets
- E Battery-Protected Outlets
- F Tel/Ethernet Jacks
- G 1.8-Meter C13 to C14 Line Cord

SPECIFICATIONS

Model	Load Capacity (VA/Watts)	Outlets (Quantity/Type)	Data Line Protection	Half-Load Runtime*	Communications Ports	Input (Cord Length/Plug Type)
SMX1500LCDT	1500/900	8/C13	tel/Ethernet	10 min.	1 x USB	1.8-meter/C14

*Runtime may vary based on battery and load condition.
