

# ECON Pneumatic actuator fig. 7902 series DA40 aluminum size top flange F04 square dimension DSQ9/14mm 1/4" BSP

econ®

Type: 7902

ERIKS item #: 12377333

Econosto item #: 593174

EAN: 8716901172662

| Attribute                         | Value                    |
|-----------------------------------|--------------------------|
| Transmission                      | Quarter turn             |
| Operating principle               | Dual-action              |
| Model                             | DA40                     |
| Top flange standard               | ISO 5211                 |
| Mounting flange                   | F04                      |
| Square dimensions [mm]            | 11                       |
| Square dimensions 2 [mm]          | 14                       |
| Shaft height [mm]                 | 30                       |
| Double-acting torque 6 bar [Nm]   | 41                       |
| Material housing                  | Aluminium                |
| Housing surface protection        | Anodized                 |
| Material cover                    | Aluminium + Epoxy        |
| Spindle material                  | Steel                    |
| Material bolts                    | Stainless steel          |
| Top flange connection             | NAMUR [VDI/VDE 3845]     |
| Distance of mounting holes        | 80x30                    |
| With mechanical setting indicator | Yes                      |
| Connection standard, air supply   | NAMUR [VDI/VDE 3845]     |
| Air supply connection             | 1/4" BSP internal thread |
