Dear Valued Customer

Dear Sir/Madam,

Updated Part Numbers for the Hydraulic Relief Valve (VR) Range

Bifold would like to make its customers aware of a Relief Valve product range part number update.

Following the transition of Marshalsea Production to Manchester, we have updated the part numbers for the Hydraulic Relief Valve (VR) Range. There are a few changes to our quoting process which we need to make you aware of.

All relief valves will now be tested on Mineral Oil as standard unless you request Water Glycol. Please do so at quotation stage as the Part Number will need to include "-WG".

All valves for Chemical Service (CS) will be tested on Water Glycol as standard.

Wire locking, where possible, is also now included in the part code "-TP" (Tamperproof), this is a chargeable feature and must be requested at quotation stage.

Example part numbers can be seen below:

VRT-SS-0200-040-N14M-N14F-N-M-WG
VRT-SS-0200-040-N14M-N14F-N-M-WG-TP

Set pressures must be advised at point of order, if the set pressure is not advised we will supply the relief valve unset.

Should you require further information or assistance, please do not hesitate to contact our Sales Department on: +44 (0) 161 345 4777 or bifold.sales@rotork.com

Yours sincerely,

GILL BANCROFT
Marketing Manager
