

N 922 STAINLESS STEEL IP 20 SERIES VACUUM PUMPS AND COMPRESSORS

N 922 STE IP 20

ADVANTAGES

- High operating pressure of max. 6 bar rel.
- High level of gas tightness: 6×10^{-3} mbar x l/s according to type examination
- Base plate enables simple and quick assembly
- Versatile in pressure and vacuum applications
- Can be used for media and ambient temperatures of up to +60 °C

POSSIBLE AREAS OF USE

- Environmental monitoring
- Process industry
- Chemical industry

The performance values for the series models shown on this data sheet were determined under test conditions. The actual performance values may differ and depend in particular on the usage conditions and therefore on the specific application, on the parameters of the components involved in the user's system and on any technical modifications carried out which deviate from the standard configuration or the as delivered condition.

If individual designs have been created for specific customers on the basis of series models, other technical performance data may apply. Before operation begins, the relevant operating instructions and/or assembly or installation instructions should be read and the safety information contained in these instructions should be noted. KNF reserves the right to make changes to the product and the associated documentation without prior notice to the customer.
