Keeping the World Flowing
for Future Generations

Limit Switch Boxes

SOLDO
CONTROLS

A rotork® Brand

Reliability in critical flow control applications

› Reliable operation when it matters

Assured reliability for critical applications and environments. Whether used infrequently or continuously, Rotork products will operate reliably and efficiently.

› Quality-driven global manufacturing

We offer products that have been designed with over 60 years of industry and application knowledge.

Our research and development ensures cutting edge products are available for multiple applications across multiple industries.

› Customer focused service and worldwide support

Rotork solve customer challenges and develop new solutions that are tailored to the needs of our clients.

We offer dedicated, expert service and support from initial inquiry, to product installation, to long term after sales care.

› Low cost of ownership

Long-term reliability prolongs service life.

Rotork helps to reduce long term cost of ownership and provides greater efficiency to process and plant.

Comprehensive product range serving multiple industries

Rotork products offer improved efficiency, assured safety and environmental protection across sectors such as the Power, Oil & Gas, Water & Wastewater, HVAC, Marine, Mining, Pulp & Paper, Food & Beverage, Pharmaceutical and Chemical sectors.

Market leaders and technical innovators

We have been the recognised market leader in flow control for over 60 years.

Our customers rely upon Rotork for innovative solutions to safely manage the flow of liquids, gases and powders.

Global presence, local service

We are a global company with local support.

Manufacturing sites, service centres and sales offices throughout the world provide unrivalled customer services, fast delivery and ongoing, accessible support.

Corporate social responsibility is at the heart of our business

We are socially, ethically and environmentally responsible and committed to embedding CSR across all our processes and ways of working.

Global experience in strategic industries

Active in every industry and
market sector around the world.

Serving customers and working
with partners.

Improving efficiency, assuring
safety and protecting the
environment.

Industry knowledge

Our engineering and application knowledge base, built over 60 years, allows us to provide innovative and reliable solutions for all flow control applications.

We work across the globe, servicing a diverse range of markets and critical applications.

Our experience of flow control is second to none.

Oil & Gas

Rotork products are used on upstream, midstream and downstream activities, ranging from offshore production facilities, to refining and processing, to transportation, storage and distribution.

- Onshore and offshore production
- Refining and petrochemicals
- Distribution and storage
- Pipelines
- LNG liquefaction and regasification
- Unconventional oil & gas

Power

Rotork products are found in traditional power stations, including nuclear power stations where its products are certified for use both inside and outside containment. They are also used for renewable energy generation systems such as thermal solar plants, and emission reduction processes such as flue gas desulphurisation.

- Conventional fuels
- Nuclear energy
- Concentrating solar power
- Geothermal and other renewables

Water & Wastewater

Rotork products are used on modern state-of-the-art water treatment and distribution processes, which maximise existing resources such as desalination plants and water re-use projects, together with conventional water and wastewater plants.

- Sludge and sewage treatment
- Water treatment, desalination and re-use
- Environmental control
- Dams, reservoirs and irrigation

Other Industries

- Marine
- Pharmaceutical
- HVAC
- Mining
- Biomedical
- Rail
- Pulp & Paper
- Food & Beverage

Instrumentation and control

Rotork is a specialist manufacturer of products for flow control, pressure control, flow measurement and pressure measurement.

Our solutions are trusted wherever there is a need for high precision and reliability, including pharmaceutical, oil and gas, biomedical and manufacturing industries.

We have production facilities throughout the world, complemented by a large network of distribution and support centres.

A full listing of our worldwide sales and service network is available on our website at www.rotork.com

Worldwide Industry and Application Experience

With over 60 years of extensive knowledge and experience, Rotork has provided products and services worldwide for virtually every industrial actuator application.

Rotork offer a range of precision control and valve accessory products in partnership with our prestigious brands, including Fairchild, Soldo®, Midland-ACS™, Bifold®, M&M and Alcon:

Instrument Valves

- Valve actuation accessories
- Solenoid valves
- Piston valves
- Instrument valves
- Medium pressure valves
- Subsea valves and connectors

Controllers

- Valve positioners
- Rail systems
- I/P and E/P converters

Measurement

- Valve position sensors
- Transmitters and switches

Instrument Pumps

- Pumps
- Intensifiers and accumulators

Rotork is proud to offer a diverse range of products which serve many different duties in a wide variety of applications. We also offer a factory customisation service to create one-off units to meet specific needs.

SOLDO
CONTROLS
A rotork® Brand

The Soldo range of limit switch boxes, proximity sensors, and accessories offers a variety of options. Rotork specialise in the design and manufacture of control accessories for valve automation, providing high quality products and services that guarantee a link between the control room and automated process valves.

Product development programs ensure we are always ready for new markets and applications and able to meet or exceed customer requirements. Soldo products are valued by customers for their advanced design and capabilities including:

Versatility

Soldo products are cost effective, as well as corrosion resistant and explosionproof; they are perfect when harsh environments are encountered. We provide the protection and automation that a wide variety of applications demand.

Unique Design Features

Soldo units are a step above the competition with unique split shaft designs. This allows installation where space is a factor and where a low profile limit switch box is not preferred. Soldo limit switches also have easy-set 3 degree cams for independent tool free adjustment.

Simple Installation

Pre-wired PCB switch modules ensure installation is worry free and allows easy installation and wiring directly into terminal strips. The pre-wired boards are conformal coated for environmental protection. We also offer a full line of mounting brackets for all models that do not come with an integral mounting kit.

Twin Shaft Design

The innovative twin shaft design provides user friendly installation, replacement, calibration and operation. Splitting the limit switch box into two halves improves the sealing arrangement to extend operating life in harsh or severe environments whilst reducing the possibility of failure.

Features:

- Shaft sections mate together with a simple and reliable mechanical linkage
- Each half of the switch box mechanically retains the shaft, preventing loss of components during disassembly
- The shaft is completely sealed from the external atmosphere, avoiding contamination of the lubricating grease
- The switch position indicator is permanently fixed to the top shaft to guarantee alignment during reassembly
- Electrical components are completely sealed once both halves of the switch box are reassembled

Upper shaft schematic for SW limit switch box

H	3D black and yellow flux indicator	
Z	Flat yellow flux indicator	

Approvals and Marking

Electrical components require a specific protection method in explosive atmospheres due to the presence of gas or dust. Different geographical regions are subject to local standards and certification to guarantee safety against explosion risks. Rotork offers a complete range of certifications, covering worldwide requirements.

Hazardous Areas and Ignition

Explosions in hazardous areas occur when flammable liquids, vapours, gases or combustible dusts are mixed with oxygen and an ignition source, causing a fire or explosion. Limiting oxygen or gas is difficult, therefore the solution is to control the ignition source or safely contain the explosion.

Intrinsically Safe Protection Method

The intrinsically safe protection method works by reducing the power supplied into the hazardous area with an Ex'ia' barrier. The power reaching the hazardous area and the device is insufficient to generate a spark thus avoiding ignition.

Explosionproof Protection Method

The explosionproof protection method guarantees that in case an explosion should happen, it will be contained inside the enclosure. All mechanical joints of the device, such as the lid to body connection, cable entries and shaft assembly have flame paths, designed and certified to ensure an explosion is contained.

* Excluding SQ and TB series

Safety Integrity Level (SIL)

SIL approval (up to SIL3 level) is available as standard for all above certifications, depending on selected switches.

For further information please follow SIL compatibility for each standard electrical feedback type on pages 14-16.

Please refer to our SIL certificate to validate your device combination.

Switch and Sensors

Rotork offer one of the widest ranges of switches in the market, providing the best switch or sensor solution for your specific application.

Soldo limit switch boxes can include mechanical, magnetic or inductive proximity switches to fulfil your plant feedback requirements. With over 20 years experience in valve automation feedback, Soldo offers a complete selection of magnetic limit switches

to meet the most critical and demanding requirements. Inert gas hermetical sealing, high power loops, different contact forms and alternative materials are all satisfied with high quality Soldo switches.

Electro mech. switches

SIL✓ (SIL) up to SIL3 approved device

Suitable for fire fighting applications

Suitable in arctic application

Suitable in Exia application

Hermetically sealed

SPDT switches

Code 01 **SIL✓**

- SPDT silver plated snap action switch
- High power loop: rating up to 5 A @ 250 VAC – 0.6 A @ 125 VDC
- Temperature range: -40 to +125 °C (-40 to +257 °F)

Code 03 **SIL✓**

- SPDT gold plated snap action switch
- Rating up to 0.1 mA @ 250 VAC – 0.5 mA @ 30 VDC
- Temperature range: -40 to +125 °C (-40 to +257 °F)

Code 5P **SIL✓**

- SPDT silver plated snap acting switch
- High power loop: rating up to 5 A @ 250 VAC
- Temperature range: -50 to +204 °C (-58 to 399 °F)
- Short time temperature range: Maximum 250 °C (482 °F) for 2 hours Maximum 300 °C (572 °F) for 70 minutes

DPDT switches

Code 1F **SIL✓**

- DPDT silver plated snap action switch
- High power loop: rating up to 5 A @ 250 VAC, 0.1 A @ 80 VDC
- Temperature range: -40 to +120 °C (-40 to +248 °F)

Code 06 **SIL✓**

- DPDT gold plated snap action switch
- Rating up to 0.1 A @ 250 VAC, 0.1 A @ 80 VDC
- Temperature range: -40 to +120 °C (-40 to +248 °F)

Magnetic switches

SPDT switches

CODE N1 **SIL✓**

- NOVA V3™ SPDT hermetically sealed snap action proximity switch
- High power loop: rating up to 5 A @ 250 VAC – 5 A @ 28 VDC
- Temperature range: -50 to +95 °C (-58 to +203 °F)

CODE N3 **SIL✓**

- NOVA V3™ SPDT hermetically sealed snap action proximity switch
- High power loop: rating up to 1 A @ 250 VAC – 1 A @ 30 VDC
- Temperature range: -50 to +95 °C (-58 to +203 °F)

CODE C4 **SIL✓**

- SPDT hermetically sealed proximity reed switch
- Inert gas contact chamber
- Rating up to 1 A @ 24 VDC
- Temperature range: -60 to +100 °C (-76 to +212 °F)

DPDT switches

CODE N4 **SIL✓**

- NOVA V3™ DPDT hermetically sealed snap action proximity switch
- High power loop: rating up to 5 A @ 250 VAC – 5 A @ 28 VDC
- Temperature range: -20 to +95 °C (-4 to +203 °F)

CODE C8 **SIL✓**

- DPDT hermetically sealed proximity reed switch
- Inert gas contact chamber
- Rating up to 1 A @ 24 VDC
- Temperature range: -60 to +100 °C (-76 to +212 °F)

Inductive sensors

Amplified sensors

Code 32

- 2 wires NO
- LED indicator
- Operating voltage 5-60 VDC
- Operating current 2-100 mA
- Temperature range: -25 to +70 °C (-13 to +158 °F)

Code 73 **SIL✓**

- 3 wires PNP NO
- LED indicator
- Operating voltage 10-30 VDC
- Operating current 0-100 mA
- Temperature range: -25 to +70 °C (-13 to +158 °F)

Code 75

- 2 wires NO/NC programmable
- Operating voltage 5-36 VDC
- Operating current 200 mA
- Temperature range: -25 to +80 °C (-13 to +176 °F)

NAMUR Exia sensors

Code 70 **SIL✓**

- Nominal voltage 8 VDC
- Current consumption: 1 mA (target detected) 3 mA (target not detected)
- Temperature range: -25 to +100 °C (-13 to +212 °F)

Code 62 **SIL✓**

- Nominal voltage 8 VDC
- Current consumption: 1 mA (target detected) 3 mA (target not detected)
- Temperature range: -50 to +100 °C (-58 to +212 °F)

Position Transmitters

If discrete feedback information is not enough, Rotork can offer a complete range of analogue position transmitter options embedded within the switch

box enclosure for both safe and hazardous areas.

Analogue 4 - 20 mA current loops are commonly used for electronic signalling in industrial process control. 4 & 20 mA

represents 0–100% of the measurement range. With the introduction of SMART devices, HART provides digital communication overlaid on the analogue 4-20 mA signal.

4-20 mA

	Series	Switch Type	Switch Quantity	Terminals	Coating		Cable Entries	Visual Indicator	Approval	Marking	IP Rating	Temperature	Material
Code:	SF	70	2	2	0	-	2	0	A	1	1	A	4

SIL✓ (SIL) up to SIL3 approved device

Suitable for Exia application

Code T0

- 4-20 mA analogue output
- Supply voltage 13-30 VDC
- Linearity $\pm 0.5\%$ on full scale
- Direct or Reverse action
- Temperature range: -40 to +80 °C (-40 to +176 °F)

Code T4

- 4-20 mA analogue output
- Additional magnetic reed switches
- Supply voltage 13-30 VDC
- Linearity $\pm 0.5\%$ on full scale
- Direct or Reverse action
- Temperature range: -40 to +80 °C (-40 to +176 °F)

Code T1

- 4-20 mA analogue output
- Additional silver plated mech. switches
- Supply voltage 13-30 VDC
- Linearity $\pm 0.5\%$ on full scale
- Direct or Reverse action
- Temperature range: -40 to +80 °C (-40 to +176 °F)

Code T7

- 4-20 mA analogue output
- Additional inductive NAMUR sensors
- Supply voltage 13-30 VDC
- Linearity $\pm 0.5\%$ on full scale
- Direct or Reverse action
- Temperature range: -25 to +80 °C (-13 to +176 °F)

4-20 mA HART

Code H0 **SIL✓**

- 4-20 mA HART Transmitter
- ATEX Ex ia IIC T6 / T4 certified
- Update time 120 ms
- Temperature range: -40 to +80 °C (-40 to +176 °F)

Code H4 **SIL✓**

- 4-20 mA HART Transmitter
- Additional magnetic reed switches
- ATEX Ex ia IIC T6 / T4 certified
- Update time 120 ms
- Temperature range: -40 to +80 °C (-40 to +176 °F)

Code H1 **SIL✓**

- 4-20 mA HART Transmitter
- Additional silver plated mech. switches
- ATEX Ex ia IIC T6 / T4 certified
- Update time 120 ms
- Temperature range: -40 to +80 °C (-40 to +176 °F)

Code H7 **SIL✓**

- 4-20 mA HART Transmitter
- Additional inductive NAMUR sensors
- ATEX Ex ia IIC T6 / T4 certified
- Update time 120 ms
- Temperature range: -25 to +80 °C (-13 to +176 °F)

Foundation Fieldbus / Profibus PA

Code F0

- Foundation Fieldbus / Profibus PA position Transmitter
- ATEX Ex ia IIC T6 / T4 certified
- Update time 400 ms
- Temperature range: -40 to +80 °C (-40 to +176 °F)

Code F4

- Foundation Fieldbus / Profibus PA position Transmitter
- Additional inductive NAMUR sensors
- ATEX Ex ia IIC T6 / T4 certified
- Update time 400 ms
- Temperature range: -25 to +80 °C (-13 to +176 °F)

Code F1

- Foundation Fieldbus / Profibus PA position Transmitter
- Additional silver plated mech. switches
- ATEX Ex ia IIC T6 / T4 certified
- Update time 400 ms
- Temperature range: -40 to +80 °C (-40 to +176 °F)

More options available on request.

Special Options

Rotork offer a wide range of options for specific field applications.

Partial Stroke Test device

Code:	Series	Switch Type	Switch Quantity	Terminals	Coating	Cable Entries	Visual Indicator	Approval	Marking	IP Rating	Temperature	Material
SF	70	2	2	0	-	2	0	A	1	1	A	4

SIL✓ (SIL) up to SIL3 approved device

 Suitable in arctic application

 Suitable in Exia application

Code P0 SIL✓

The Partial Stroke Test (PST) device is a simple and reliable electro-mechanical system. A magnetic key initiates the test while an internal electro-mechanical system drives the actuator back to the opening position after the last position has been reached. Includes:

Code P4 SIL✓

Magnetic reed SPDT switches

Code P7 SIL✓

Exia inductive NAMUR sensors

Surge protector devices

Code S6

Surge protectors guard the device and all inner electrical components from external power overloads. Certification is available for Exia or Exd, with components in 316 stainless steel for harsh environments protection. Includes:

Code S7

Exia inductive NAMUR sensors

Code SC

Exia inductive NAMUR sensors tamper proof magnetic reed SPDT switches

End Of Line monitoring system

Code:	Series	Switch Type	Switch Quantity	Terminals	Coating	Cable Entries	Visual Indicator	Approval	Marking	IP Rating	Temperature	Material	Special Execution			
	SF	70	2	2	0	-	2	0	A	1	1	A	4	0	0	28

Code 28 SIL✓

End of line monitoring system to perform diagnostics on switches and wiring integrity. The DCS will detect feedback information as well as fault detection.

Applicable to electro-mechanical and magnetic switches, with reduced max rating capabilities.

- NAMUR simulated output
- Arctic capabilities down to -60°C (-76 °F)
- SIL3 approved option

More options available on request.

HART Communication

The HART Communication Protocol (Highway Addressable Remote Transducer) is a hybrid, analogue and digital, industrial automation protocol.

HART provides two simultaneous communication channels: the 4-20 mA analogue signal and a digital signal. The 4-20 mA signal communicates the primary measured value. Additional device information is communicated using a superimposed digital signal on the analogue one.

Rotork can offer a complete range of 4-20 mA HART position transmitters with or without additional switches.

Refer to the Position Sensor section for a wider list of options and code selection guide.

Foundation Fieldbus Communication

Rotork offers a complete range of Foundation Fieldbus position transmitters with or without additional digital feedback.

The communication head is suitable for use in an Intrinsically Safe Ex'ia' loop and provides full compatibility with the plant communication software.

Refer to the Position Sensor section for a wider list of options and code selection guide.

AS-i Communication

Superior productivity is one of the key factors to successful business in the process automation sector. The secret to modern manufacturing is flexibility.

AS-Interface (AS-i) is the simplest of the industrial networking protocols used in PLC, DCS and PC-based automation systems. It is designed for connecting binary (ON/OFF) devices such as actuators and sensors in discrete manufacturing and process applications using a single cable.

Features

- Highly efficient alternative to hard wiring of field devices
- Excellent partner to Profibus, DeviceNet, Interbus and Industrial Ethernet network systems
- Proven in hundreds of thousands of applications
- Cut-down AS-i SW version available for ultra-simple devices
- Provides the ideal basis for Functional Safety in machinery safety/emergency stop applications

AS-I Communication Board

Code A1

AS-I communication board 4 In – 3 Out.

Up to four electro-mechanical switches and three solenoid valve connection.

Available on SB, SF, SS, HW, SY, SW series.

	Series	Switch Type	Switch Quantity	Terminals	Coating	Cable Entries	Visual Indicator	Approval	Marking	IP Rating	Temperature	Material	
Code:	SF	70	2	2	0	-	2	0	A	1	1	A	4

Profibus Communication

Profibus® Option

We introduced the Profibus communication bus into our HW series to provide a complete control unit, facing all demanding field applications.

Features and Benefits

- Weatherproof enclosure
- 3D red and green visual position indicator
- 2½" NPT cable entries
- 1¾" NPT cable entry
- Profibus communication board
- Two digital inputs for valve position detection
- Two extra dry contact inputs available
- Two digital outputs for solenoid valve connection
- Adjustable metal cams
- Integrated mounting legs for NAMUR actuators
- Integrated sov, 5/2 or 5/3 way configuration

Profibus Control Unit

Code PF

Profibus DP control unit.
Two digital feedback and two digital output for solenoid valves.

Code PG

Profibus DP feedback unit.
Two digital feedback and two digital output for solenoid valves.
Additional two mechanical switches 5A 250 VAC.
Both options available on HW series.

	Series	Switch Type	Switch Quantity	Terminals	Coating	Cable Entries	Visual Indicator	Approval	Marking	IP Rating	Temperature	Material	
Code:	SF	70	2	2	0	-	2	0	A	1	1	A	4

SP - SM limit switch box series

Compact limit switch box for industrial, water treatment and light duty applications.

Features

- Integrated mounting kit for NAMUR pattern
- Corrosion free glass reinforced plastic enclosure on SP series
- Nickel plated aluminium body on SM series
- One cable entry (SP) or two cable entries (SM) either metric or imperial
- Multiple indicator options
- Easy wiring through the terminal PCB board

B = Ambient temperature range: -20 to +70 °C (-4 to +158 °F) (for switch 73)
E = Ambient temperature range: -25 to +80 °C (-13 to 176 °F) standard for switch 70, 75
F = Ambient temperature range: -25 to +70 °C (-13 to +158 °F) standard for switch 73.
2 = Ambient temperature range: -40 to +40 °C (-40 to 104 °F) only applicable to C4, C8 switches with UL approval.
4 = Ambient temperature range: -60 to +40 °C (-76 104 °F) extended temperature range applicable to C4, C8 switches with UL approval.

Material

4 = Copper free aluminium (on SF series)
6 = 316 stainless steel heavy duty enclosure (on SS series)

HW limit switch box series

Control unit that combines a limit switch box and solenoid valve into a single device. Maximum efficiency with minimum customer effort.

Features

- Twin shaft design
- Self lubricating bushings
- Optional integrated solenoid valve for maximum efficiency and compactness
- Three or five way pneumatic valve with single or double coil configurations
- Aluminium enclosure with thick powder coat paint and integrated NAMUR mounting kit
- Up to three cable entries either metric or imperial
- Multiple indicator options

- Easy wiring through the terminal PCB board
- Optional position transmitter boards
- Optional Profibus communication board for complete process handling

Approvals

70 = Inductive NAMUR proximity NJ2-V3-N, 2 wire, up to SIL3, Exia ready, (Switch qty: 1,2; Terminal digit: 0; temp digit: E)
73 = Inductive proximity NBB2-V3-E2, PNP NO, up to SIL3, (Switch qty: 1,2; Terminal digit: 0; temp digit: F)
75 = Inductive proximity IS5026, 2 wire, NO /NC, (Switch qty: 1,2; Terminal digit: 0; temp digit: E)

See additional information and options on pages 14-19

Switch Quantity

2 = 2 switches

Terminals

0 = Prewired terminal strip with additional extra poles for solenoid valve connection (for switches 01, 03, C4, N1, N3, 70, 73, 75)
A = Prewired terminals without solenoid valve connection (for switches 1F, 06)

Coating

0 = Black powder coating (SK Series) Aluminium
E = Electro polish finishing (SQ Series) Stainless Steel

Cable Entries

1 = 2 cable entries 1/2" NPT
2 = 2 cable entries M20 x 1.5

Visual Position Indicator

0 = 3D plastic visual position indicator red and green
T = 3D stainless steel position indicator

See additional information and options on page 11

Approval

X = ATEX and IECEx certified box
G = EAC certification for Russian market
I = INMETRO certification for Brazilian market
N = NEPSI certification for Chinese market
J = CCOE certification for Indian market
U = UL certified box (only for SK series)
W = Weather proof

See additional information and options on page 13

Marking

0 = Standard location
2 = Certification marking: Ex II 2GD Exd IIC
7 = cULus Class 1/2 Div1 (only for SK series)
8 = cULus Class 1/2 Div 1/2 with switches code: C4, N1, N3. (Only for SK series)

See additional information and options on page 13

IP Protection rating

3 = Weather proof IP66/IP68
7 = NEMA 4 and 4X

Temperature

L = Ambient temperature range: -40 to +80 °C (-40 to +176 °F) standard for all switch options, excluding: 70, 73, 75
E = Ambient temperature range: -25 to +80 °C (-13 to +176 °F) standard for switch 70, 75
F = Ambient temperature range: -25 to +70 °C (-13 to +158 °F) standard for switch 73.
M = Ambient temperature range: -50 to +80 °C (-58 to +176 °F) extended temp range for switches N1, N3
N = Ambient temperature range: -55 to +80 °C (-67 to +176 °F) for switch code C4 (extended temp range for switches C4)

Material

3 = Die-cast aluminium heavy duty body and cover (on SK series)
7 = 316L stainless steel heavy duty enclosure (on SQ series)

Note: optional mounting kit for NAMUR actuators ordering code: KN07

SY - SW limit switch box series

Limit switch box for heavy duty explosionproof applications in the oil & gas and petrochemical industries, both on-shore and off-shore.

Features

- Twin shaft design
- Metallic self lubricating bushings
- Copper free aluminium or 316 stainless steel housing option for maximum corrosion protection
- Up to four cable entries either metric or imperial
- Multiple indicator options
- Easy wiring through the terminal PCB board
- High volume for the maximum wiring comfort
- Optional position transmitter board
- Suitable for arctic environments

BM - TB limit switch box series

Limit switches for hazardous areas with Exd or Exia protection methods. Designed for linear valves and general purpose applications.

Features

- AISI 316 stainless steel rugged BM series enclosure
- Standard 450 mm flying leads
- Stainless steel or aluminium materials for optional junction box with TB series
- Magnetic or ferrous sensing capabilities
- Subsea application on request, tested up to 300 bar
- Optional subsea cable and connector for underwater link

Approvals

L = Ambient temperature range: -40 to +80 °C (-40 to +176 °F)

Material

6 = 316 stainless steel heavy duty enclosure

8 = 316 stainless steel with aluminium junction box (only for TB series)

3 = Aluminium (available for UL approval only)

* SIL2 and SIL3 available on request

** Subsea cable with fast connector with standard length as follow: 5, 20, 40 mt

Sensing Distance Chart

Sensing Distance	Switch	Direction A [Values in mm]		Direction B [Values in mm]			
				Target distance: 2 mm		Target distance: 1 mm	
	BMN1	PI : Max 2	DO : 6	PI : 3	DO : 12	PI : 7	DO : 12
	BMC4	PI : 3,6	DO : 6	PI : 4	DO : 5	PI : 4,5	DO : 7
Frequency Range	BMN1	Max 30 Hz					
	BMC4	Max 100 Hz					
Response Time	BMN1	Single operation < 2ms		Operation in frequency (10÷30 Hz) < 1 ms			
	BMC4			2 ms			

Notes:

PI: Is the point where the switch first operates.

DO: Is the point where the switch is released.

PI & DO values refers to the distance between the Z axis of BOLT switch and target.

Target distance refers to the distance between the 2 opposite faces of BOLT switch and target.

For BMN1 switch the maximum operating distance is 2 mm using a properly size ferrous target.

This distance may be increased using a magnetic target (optional).

BMC4 switch is supplied with its standard magnetic target.

Optional magnetic target to increase the sensing range of the switch are available. For any kind of request please contact SOLDI.

ES Easy limit switch box

Limit switch box created and engineered for manual valve application in explosionproof environments.

Features

- Proximity non-contact design
- Easy to install and simple to maintain
- Copper free aluminium or 316 stainless steel housing option for maximum corrosion protection
- Single or double cable entries options either metric or imperial
- Easy wiring through terminal PCB board
- Suitable for arctic environments

Mounting Kits

The Rotork KN and KNC mounting kit series have been designed to mount almost any device on a NAMUR pattern actuator.

KN and KNC mounting kits are made from AISI 304 stainless steel to provide a reliable solution to install your ISO F05 drilled device to complete the automated valve package.

NAMUR pattern VDI / VDE 3845	KN	KNC	KN07
30 x 80 pinion height 20 mm	01	01	OK

30 x 80 pinion height 40 mm	05	—	OK
30 x 130 pinion height 40 mm	—	05	OK
25 x 50 pinion height 20 mm	—	32	—
Mounting kit dedicated to all Soldo limit switch box series (excluding SP, SM series)			—
Adjustable mounting kit dedicated to SK and SQ series only	—	—	

Mounting Kits

Linear Mounting Kit

Linear diaphragm and piston actuators have always been problematic to mount, often requiring external switches to indicate position, therefore losing the flexibility and benefits of a limit switch box.

With the linear universal mounting kit, we provide a proven system to fit every limit switch box in our range to a linear valve from 20 up to 250 mm stroke with two different kit layouts: 20-150 mm stroke; 100-250 mm stroke.

The mounting kit includes a specific position dome indicator, perfectly showing the open/close position status.

The graduated lever system, combined with the remote pin connection, offers great flexibility to fit a huge variety of systems and offers precise adjustment on the go.

Actuator Mount Patterns Compatibility

Appendix A: Equipment Certification Requirements for Hazardous Locations

ATEX & IECEx Certificate Number

Suffixes: U – component certification
 X – special conditions for safe use apply

Apparatus Groups [ATEX and IECEx]

Group	Environment	Location	Typical Substance
I		Coal Mining	Methane (Fire damp)
IIA	Gases, Vapours	Surface and other locations	Acetic acid, Acetone, Ammonia, Butane, Cyclohexane, Gasoline (petrol), Kerosene, Methane (natural gas) (non-mining), Methanol (methyl alcohol), Propane, Propan-2-ol (iso-propyl alcohol), Toluene, Xylene
IIB			Di-ethyl ether, Ethylene, Methyl ethyl ketone (MEK), Propan-1-ol (n-propyl alcohol), Ethanol (ethyl alcohol)
IIC			Acetylene, Hydrogen, Carbon disulphide
IIIA	Combustible Dusts	Surface and other locations	Combustible flyings
IIIB			Non-conductive
IIIC			Conductive

Apparatus Groups (US / CAN)

Substance	Hazard Class	NEC 500	NEC 505
Acetylene	Class I Flammable Gases	Group A	IIC
Hydrogen		Group B	IIC
Ethylene		Group C	IIB
Propane		Group D	IIA
Methane (mining)		Group D	-
Combustible Metal Dusts	Class II Combustible Dusts	Group E	-
Combustible Carbonaceous Dusts		Group F	-
Combustible Dusts not in Group E or F (Flour, Grain, Wood, Plastics, Chemicals)		Group G	-
Combustible Fibers and Flyings	Class III Fibers and Flyings	-	-

Classification of Divisions and Zones

Type of Area	NEC and CEC*	ATEX and IEC	Definitions
Continuous hazard	Division 1	Zone 0 / Zone 20 Cat 1	A place in which an explosive atmosphere is continuously present
Intermittent hazard	Division 1	Zone 1 / Zone 21 Cat 2	A place in which an explosive atmosphere is likely to occur in normal operation
Hazard under abnormal conditions	Division 2	Zone 2 / Zone 22 Cat 3	A place in which an explosive atmosphere is not likely to occur in normal operation, but may occur for short periods

* On occasion the ATEX and IEC Zones may be used in the corresponding NEC and CEC system

Temperature Classification

Classification of maximum surface temperatures for Group II Electronic Equipment (T Class).

Dusts Typical Ignition Temperatures

Dusts	Cloud	Layer
Aluminium	590 °C (1,094 °F)	>450 °C (842 °F)
Coal dust (lignite)	380 °C (716 °F)	225 °C (437 °F)
Flour	490 °C (914 °F)	340 °C (644 °F)
Grain dust	510 °C (950 °F)	300 °C (572 °F)
Methyl cellulose	420 °C (788 °F)	320 °C (608 °F)
Phenolic resin	530 °C (986 °F)	>450 °C (842 °F)
Polythene	420 °C (788 °F)	(melts) °C
PVC	700 °C (1,292 °F)	>450 °C (842 °F)
Soot	810 °C (1,490 °F)	570 °C (1,058 °F)
Starch	460 °C (860 °F)	435 °C (815 °F)
Sugar	490 °C (914 °F)	460 °C (860 °F)

Ingress Protection Codes

First Number (protect from solid bodies)		Second Number (protect from water)	
0	No protection	0	No protection
1	Objects > 50mm	1	Vertical drip
2	Objects > 12.5mm	2	Angled drip
3	Objects > 2.5mm	3	Spraying
4	Objects > 1.0mm	4	Splashing
5	Dust-protected	5	Jetting
6	Dust-tight	6	Powerful jetting
		7	Temporary immersion
		8	Continuous immersion

Enclosure Type Ratings (NEMA / CSA / UL)

Type	Area	Brief Definition
1	Indoor	General purpose
2	Indoor	Protection against angled dripping water
3, 3R, 3S	Indoor / Outdoor	Protection against rain, snow
4, 4X	Indoor / Outdoor	Protection against rain, snow, hose directed water
5	Indoor	Protection against angled dripping water, dust, fibers, flyings
6	Indoor / Outdoor	Protection against temporary submersion
6P	Indoor / Outdoor	Protection against prolonged submersion
12, 12K	Indoor	Protection against circulating dust, fibers, flyings
13	Indoor	Protection against circulating dust, fibers, flyings, seepage

Notes

A dark grey, stylized world map is overlaid with a white grid of latitude and longitude lines, serving as a background for the lower half of the page.
