

Bifurcated contacts with excellent electrical conductivity/SH-4, SH-5

■ Description

SH series industrial relays are designed to increase contact reliability and make them easy to use. The relays' highly reliable, bifurcated contacts allow them to be used in low-level circuits of 5V, 3mA. Various optional function units such as auxiliary contact blocks, coil surge suppression units can be added to the relays, allowing fast and field modification.

■ Types and ratings

Type	SH-4				SH-5	
Pole (No. of contacts)	4		8		5	
Contact arrangement	4NO, 3NO+1NC, 2NO+2NC		8NO, 7NO+1NC, 6NO+2NC 5NO+3NC, 4NO+4NC		5NO, 4NO+1NC, 3NO+2NC 2NO+3NC, 1NO+4NC, 5NC	
Thermal current (A)	10		10		10	
Rated operational current (A)	Volts	AC-15 (ind.)	AC-12 (res.)	Volts	DC-13 (ind.)	DC-12 (res.)
	110V AC	6	10	24V DC	3	5
	220V AC	3	8	48V DC	1.5	3
	440V AC	1.5	5	110V DC	0.55	2.5
	550V AC	1.2	5	220V DC	0.27	1
Standard operating coil voltage	100V 50Hz/100–110V 60Hz, 200V 50Hz/200–220V 60Hz, 380V–400V 50Hz/400–440V 60Hz					
Mechanical durability	10 million operations					
Electrical durability (AC-15)	500,000 operations (at operational current)					
Operating cycles per hour	1,800					
Ambient temperature	–5 to +50°C

Industrial Relays

SH series

General information

■ Optional units

• Front mounting

Auxiliary contact block

2 or 4-pole

Highly reliable bifurcated contact can be used in low-level circuit of 5V, 3mA.

Operation counter

This counter indicates the number of relay ON-OFF operations to ensure easy maintenance and inspection.

Terminal cover

The relay can easily be fitted with terminal covers for finger safety.

• Top mounting

Coil drive unit

This unit controls ON-OFF operation for industrial relay with output from electronic equipment.

Coil surge suppression unit

This unit absorbs coil surge voltage due to relay ON-OFF operations.

• Side mounting

Auxiliary contact block

2-pole (1NO+1NC)

• Separate mounting

Off-delay release unit

This industrial relay can be held in closed position even when the instantaneous power failure occurs.

Easy modular system

Standard type industrial relays

■ Description

They are compact and highly efficient and have a long service life, and are suited for industrial electrical control applications. Typical applications include machine tools, process lines, conveyors and automatic and semi-automatic equipment. The maximum contact ratings are 550 volts AC and 220 volts DC. Operating coils with rating of up to 600 volts AC are available.

■ Features

- Mounting compatible with conventional SRC50 series industrial relays
- Employing of bifurcated contact to increase high contact reliability in low-level circuit use (5V, 3mA) and single button auxiliary contact applicable for large current circuit use.

- Variety of optional function units available
Auxiliary contact block (2 or 4-pole)
Off-delay release unit
Coil surge suppression unit
Operation counter

- Snap-on 35mm IEC and DIN rail mounting available
- Meets JIS, IEC, BS, NEMA and VDE Standards
UL, CSA, TÜV, CCC, BV and LR approved
- Terminal numbers meet IEC

	5NC	4NO+5NC	–	–

- Notes:
- Both front mounting and side mounting auxiliary contact blocks cannot be mounted on a relay at a time.
 - Any auxiliary contact blocks cannot be mounted on 8-pole type SH-4 and SH-4H relays.
 - Side mounting contact blocks (SZ-AS1), with bifurcated contacts, can be mounted on SH-4H and SH-5H.

■ Ordering information

Specify the following:

1. Ordering code

■ Dimensions, mm
SH-4, 4H/4-pole

Mass: 0.32kg

SH-4, 4H/8-pole

Mass: 0.36kg

SH-5, 5H/5-pole

Mass: 0.34kg

Notes on panel drilling
• Use the two mounting holes on a diagonal line to mount a relay.
• Mounting holes indicated by ① and ② are compatible with those of SRC type.
• Mounting holes indicated by ③ conform to IEC Standards.

■ Contact arrangement

Industrial Relays

SH series

DC-operated type

DC-operated industrial relays

■ Description

The operating coil is a DC type instead of AC and is energized by a DC power source.

The coil ratings from 24V DC to 220V DC. The maximum contact ratings are 550V AC or 220V DC.

These relays are typically used where DC is used as a power source on switchboards. Where AC is used as a power source, sequence control is frequently lost due to the troubles such as power failure or momentary voltage drop.

In the case of DC-control, a battery power supply is frequently used because it is not susceptible to external influences. DC-operated relays are highly suitable for important control applications.

■ Features

- Employing of bifurcated contact to increase high contact reliability in low-level circuit use (5V, 3mA)
- Variety of optional function units available

■ Contact ratings

Industrial Relays

SH series

Off-delay release type

Off-delay release industrial relays

■ Description

This type of control relay has a capacitor connected in parallel with the operating coil, and the contacts are released with a delay of 1 to 5 seconds after the coil has been de-energized. If a momentary voltage drop or a power failure in AC control power supply of standard type control relay takes place, the operating coils are de-energized. Reclosing of the contacts must be carried out every time. The off-delay release relay is so designed that in the event of a brief power outage the coil will not release the contacts and control sequence is maintained.

■ Operation

The power supply is fed to the rectifier which in turn charges the capacitor. When a power failure takes place, the discharge current flows into the magnetic coil which holds the relay closed for 1 to 5 seconds. When the switch (SW) is opened the contacts will immediately open without delay.

■ Wiring diagram

■ Ordering information

Specify the following:
1. Ordering code

Note:
When ordering, make sure that the input voltage (AC) of the OFF-delay release unit is equal to the operating voltage (DC) of the industrial relay.
Example:
SZ-DE 100V AC 50Hz+SH-5/G 100V DC
(OFF-delay release unit)+(Relay)

Mechanical latch industrial relays

■ Description

Mechanical latch relays are used where operating sequence continuity must be maintained regardless of any outside interruptions, such as power failures or momentary voltage drop.

These relays are provided with two coils.

One is a closing coil (CC) and the other is a trip coil (TC). An interlocking circuit is provided between the CC coil and TC coil. Since no coil voltage is applied during operation it is extremely economical and also quiet.

■ Operating method

● Closing

When the closing coil is energized the latch mechanism interlocks to latch and the NC contact connected in series with the closing coil opens and the coil is de-energized.

Operating notes

- When carrying out a sequence operating check make sure that the load is disconnected.
- The electrical signal time for closing and tripping should be 0.3 sec. or more.
- Both the closing and tripping coils are short time rating.
Closing coil: Max. 30 seconds
Trip coil: Max. 15 seconds
- Since the relay and the latch mechanisms are adjusted at the time of assembly, do not strip nor replace the contacts in the field.
- If current is applied simultaneously to both the closing and tripping circuits, the coils may be heated and damaged. An interlocking circuit is required to prevent this.

■ Types and ordering code

AC operated Type	Ordering code	DC operated Type	Ordering code	Contact arrangement	Rated thermal current (A)	Make/break capacity AC (A)
SH-4/V	SH04AV-■□	SH-4/VG	SH04AD-■□	3NO, 2NO+1NC, 1NO+2NC	10	60
				5NO+2NC, 4NO+3NC 3NO+4NC		30
SH-5/V	SH05AV-■□	SH-5/VG	SH05AD-■□	4NO, 3NO+1NC, 2NO+2NC	10	15
						12

Notes: • Enter the coil voltage code in the ■ mark.
• Enter the contact arrangement code in the □ mark.
• Rated operational current: Same as standard type, see page 03/3.

■ Coil ratings

Type	Operating coil Voltage	Code	Power consumption		Minimum energized time		Time rating		Operating voltage range
			AC operated Closing	AC operated Tripping	DC operated Closing	DC operated Tripping	Closing	Tripping	
SH-4/V	100V/100–110V AC 50Hz/60Hz	1	95VA	150VA	7W	150W	0.3 sec.	30 sec.	0.85 to 1.1 times coil rated voltage
SH-5/V	200V/200–220V AC 50Hz/60Hz	2							
SH-4/VG	100V DC	1							
SH-5/VG	110V DC	H							
	200V DC	2							
	220V DC	M							

Note: Coil voltage range from 24V to 220V AC and 24V to 220V DC is available.

● Tripping

When the trip coil is energized the latch is released and tripping is carried out by means of the back spring. At this time the NO contact connected in series with the tripping coil opens.

■ Performance data

- Mechanical durability: 1 million operations
- Electrical durability: 500,000 operations (at AC-15 rated operational current)
- Operating cycles per hour: 1200
- Allowable ambient temp.: -5°C to +50°C

■ Ordering information

Specify the following:

1. Ordering code

Notes:

- Mechanical latch units cannot be sold separately.
- Do not detach mechanical latch units from relays and do not make modifications such as attaching mechanical latch units to other industrial relays.

■ Manual operating sequence

Closing: Press the button in the direction of the arrow.

Tripping: Push the lever in the direction of the arrow.

Industrial Relays

SH series

With extra pick-up operating coil

Industrial relays with extra pick-up operating coil

Description

Generally, ordinary control relays are designed to operate within 85–110% of the rated voltage. However, relays with extra pick-up operating coils have a wider operating range of 75–110% of their normal rated voltage. They are used where the control power source is low and occasional voltage drops can be expected. Their performance is dependable in spite of low voltage conditions. Their outer dimensions and performance are similar to the standard type relay. They have a mechanical durability of 2.5 million operations.

Industrial Relays

SH series

With quick terminals

Industrial relays with newly developed quick terminals

Description

The product and terminal structure comply with international safety standards. It complies with VGB4, DIN57106, and VDE0106 Teil 100 which are recommendation for preventing the exposure of charging current part.

Components such fork crimp terminals, and ring crimp terminals are inserted and secured by tightening the terminal screw. See Figures 1 to 3.

- Features**
- Easy wiring
Wiring time is at least 50% shorter than the conventional screw type terminal.
 - Safety
The finger protection feature protects the charging current part during maintenance and check (complying with EN60947-4-1, and IEC60947-4-1)
