

3171 Range

The FFE vibration switch has a strong heritage of providing the best protection of high value machinery in the most demanding of environments.

Our low-cost, robust, vibration-sensitive switch is a simple protection device that senses vibration and triggers an alarm or shuts down a machine if the vibrations exceed a present level.

FFE vibration switches, are triggered from faults such as imbalance, misalignment, looseness, worn bearings, cracked gears or lubrication problems.

At our UK production site, all our vibration switches are built to our highest standards with every device being tested before being shipped.

Manual Reset type Weatherproof Vibration Switches

- 8000-000 Single Pole Silver Contacts
- 8010-000 Single Pole Gold Contacts
- 8001-000 Double Pole Silver Contacts
- 8011-000 Double Pole Gold Contacts

Remote Reset type Weatherproof Vibration Switches

- 8001-010 Double Pole Silver Contacts with 24V Solenoid
- 8001-020 Double Pole Silver Contacts with 110V Solenoid
- 8001-030 Double Pole Silver Contacts with 240V Solenoid

Manual Reset type Explosionproof Vibration Switches

- 8110-000 Single Pole Gold Contacts
- 8111-000 Double Pole Gold Contacts
- 8100-000 Single Pole Silver Contacts
- 8101-000 Double Pole Silver Contacts

Our vibration switches come with a 2 year manufactures warranty. At the point of manufacture, our switches are set to 3g as standard. If a customised g' setting of between 1g to 9g is required, this is at an additional cost.

Test certificates are supplied as standard with every shipment and any other required certification is available on request at an additional cost. Please visit our website for availability and pricing.
