Specially compounded adhesive made of aluminium and PET cloth

Heat reflection adhesive tapes for manual bundling of wire harnesses that are exposed to high radiant heat

High-quality EFTE cables can be replaced by cables with a lower temperature class (e.g. XPE cables) due to a significant drop in inner harness temperature by reflecting the radiant heat (see graph)

3,000 h heat resistance at 125 °C when glued, short term up to 240 h at 150 °C depending on cable material (inner temperature)

Outstanding chemical resistance to motor vehicle and other operating fluids

Excellent resistance to cold and heat

Resistant to ageing and rotting

Compatible with many cable insulation materials (e.g. XPE and PP)

PVC-compatible

Very stable, abrasion- and tear-resistant textile carrier

	1288 X
CARRIER	Aluminium-clad
ADHESIVE	Acrylic
WIDTHS IN mm	19, 25
THICKNESS IN mm	0.28
ABRASION CLASSES	D
SOUND DAMPENING CLASSES	A
HEAT RESISTANCE	125
