

Direct drive gear pump-motor unit DGA04 series

The DGA04 series direct drive gear pumps derive from the well established mag drive MG200 series. Built to handle clean water, milk and relatively viscous fluids at low pressure, the DGA04 series pump-motor unit, designed and manufactured with in mind our most demanding customers, is capable of delivering smooth and accurate stream of fluid at a maximum temperature of 70 °C (158 F). The extreme compactness of its design makes it the preferred choice where space is limited. Suction/discharge ports are M5 female threaded. Motor version (brush type):

- 2000 rpm, 18 V DC

MAIN APPLICATIONS

- Milk foaming
- Fluid transfer
- Syrup dispensing
- Sanitization
