PureLine D AF

UV TREATMENT FOR FOOD AND BEVERAGE

Our **PureLine D AF** systems are aimed specifically at providing UV treatment for product and process waters used in the food and beverage industry.

By using a UV system you will eliminate harmful micro-organisms, reduce the bio-burden, protect against bio-fouling, lead to fewer CIP/SIP cycles and lower operating costs. Each system comes with a UV monitor to measure the active output of the UV system and make it easy to monitor and log performance.

Application Optimised UV for Food & Beverage
