

Microdot Input Adaptor type EQ2353 data sheet

1. Application

For connecting charge type accelerometers to a preamplifier.

2. Usage

EQ2353 is intended as a easy-to-use connection between the charge accelerometer and the charge preamplifier. It is equipped with 2 micro-dot connectors for connecting the accelerometer.

EQ2353 may be delivered in a special version for connecting a single-end accelerometer to a charge amplifier type 2661 or 2667 (Order EQ2353-W-001).

3. Technical Data

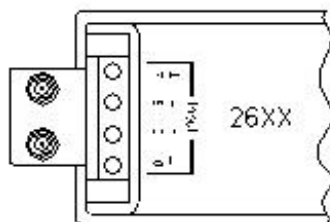

Dynamic:

Sensitivity: 1:1

Mounting space:

The Input adaptor is mounted directly into the charge preamplifier.

Connection to charge preamplifier:

Brüel & Kjær Vibro A/S reserves the right to change specifications without notice
