C2 TM

BIZERBA

The new checkout scale generation for your POS: Rely on fast and accurate weighing and pricing operations with the new C2 series.

Due to the extremely high availability and its flexible interface protocols this weighing system can be perfectly integrated in your cash register system.

More information
High performance
with a wide range of
solutions and options.

Product description

The Bizerba C2 TM expands the checkout solution to a complete POS workstation. Take advantage of our modular concept that can be customized to your needs: Flexibly connect the C2 TM to a hardware or software display. Our stand-alone solution offers flexible placement. The USB interface allows easy connection to the cash register system. The unit price – with or without tare value as desired – is transferred from the cash register to the scale which then calculates the selling price on the basis of the weight determined. The relevant process is visualized either via a hardware (P display) or a software display.

C2 TM

Highlights

- Reliable, accurate weighing and price calculation processes in the scale through carefully matched hardware and software components
- Optionally with integrated tilt compensation
- USB interface for quick and easy integration to current and future POS systems
- Less operating costs thanks to low energy consumption
- Eco-friendly product packaging

Options

- Software display license for the metrologically approved display of the weighing data on the POS
- Separate, one-sided P display (weight, unit price, selling price and tare) on stand
- Tilt compensation

P display

My Bizerba

We offer you solutions from a single source which can be customized and allow you to respond to any change in a flexible manner. Benefit from costs which can be planned and efficient processes. We are happy to advise you.
